Capital and accumulation, \$650,000. THIS Company is one of the oldest, and among the most prudently and successfully conducted in the country. The primary object in conducted in the country. The primary object in conducting its business has been to provide perfect security under all concelvable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is deserved.

Brery insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium.

The directors are required to be pecuniarily interested in the company, and they give it their personal attention; and bonds of sufficient security are given by its officers for the faithful performance of their duties.

Insurance may be effected for the benefit of the wife, which is secured to her by law beyond the reach of a husbami's creditors; and creditors may insure the lives of debtors.

Highly Important to Farmers. THE ONLY EXCLUSIVE PARMERS' INSURANCE COMPANY IN THE WEST, The madison mutual,

THIS Company continues to take risks upon Farm Property only, consisting of buildings of all kinds, (belonging to farmers,) household furniture, grain in barns, live stork, &c., from one to five years, at lower reates than most other responsible companies.

All fosses promptly paid at the office as soon as proof is made thereon.

We believe it to be for the interest of the farmers to insure by themselves, their property being less hazardous than any other, consequently you will have rolloses only your own of the same class, and all will le on an equal footing.

Experience has shown that two-thirds, if not three-fourths of all the fires that occur are upon stores, tayerns, mills, shops and such like property. In this company all such property is rejected institution, by letters, including.

New England Mutual Life Ins., Of Boston, Mass., Chartered in 1843.

Capital and accumulation, \$650,000. THIS Company is one of the oldest, and among the most prudently and successfully conducted in the country. The primary object in conducting its business has been to provide perfect security under all conceivable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is observed.

Every insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium.

The directors are required to be necuniarily interest.

The directors are required to be pecuniarily interested in the company, and they give it their personal attention; and bonds of sufficient security are given by its officers for the faithful performance of their duties.

Insurance may be effected for the benefit of the wife, which is secured to her by law beyond the reach of a husband's creditors; and creditors may insure the lives of debtors.

WILLARD PHILLIPS, President; B. F. STEVENS, Sec'y; CHAS. PULKER, Agent. O. P. Robinson, Examining Physician.

Highly Important to Farmers. THE ONLY EXCLUSIVE FARMERS' INSURANCE COMPANY IN THE WEST, THE MADISON MUTUAL, LOCATED AT MADISON, WISCONSIN.

THIS Company continues to take risks upon Farm Property only, consisting of buildings of all kinds, (belonging to farmers,) household furniture, grain in barns, live stock, &c., from one to five years, at lower rates than most other responsible companies.

All losses promptly paid at the office as soon as proof

made thereon.

We believe it to be for the interest of the farmers to insure by themselves, their property being less hazardous than any other, consequently you will have 10
losses only your own of the same class, and all will be
on an equal footing.

Experience has shown that two-thirds, if not three-

fourths of all the fires that occur are upon stores, taverns, mills, shops and such like property. In this company all such property is rejected restrively, by LET-ING THEM ALONE.

Farmers, look to your own interest, and insure in a Farmers' Company.

We have been doing business a little over three years, and we have not been obliged to assess our premium notes, and for the last fourteen months we have not had a single dollar loss, though doing a large and prosperous business, which we believe to be without a parallel in the history of insurance.

The best of references given as to the responsibility of the company.

THIS Company is one of the oldest, and among the most prudently and successfully conducted in the country. The primary object in conducting its business has been to provide perfect security under all conceivable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is observed.

Every insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium. The directors are required to be pecuniarily interested in the company, and they give it their personal attention; and bonds of sufficient security are given by its officers for the faithful performance of their duties. Insurance may be effected for the benefit of the wife, which is secured to her by law beyond the reach of, a busband's creditors; and creditors may insure the lives of debtors.

We believe it to be for the interest of the farmers to insure by themselves, their property being less hazardous than any other, consequently you will have to losses only your own of the same class, and all will be on an equal footing.

Experience has shown that two-thirds, if not three-fourths of all the fires that occur are upon stores, tayerns, mills, shops and such like property. In this company all such property is rejected Pusitively, by Letting Theory. Alone.

pany all such property is rejected restricted, by Letting them. Alone.

Farmers, look to your own interest, and insure in a Farmers' Company.

We have been doing business a little over three years, and we have not been obliged to assess our premium notes, and for the last function months we have not had a single dollar loss, though doing a large and prosperous business, which we believe to be without a parallel in the history of insurance.

THURSSDAY MORNING, AUG. 17, 1854.

We have received a note from Mr. Noggle in relation to the publication of his oration at Fulton now in progress in our columns, which is of a character for which there is thus far no provocation. If Mr. Noggle has any explananials to make in the matter, or wishes to criticise the literary productions of Mr. Armstrong, he shall have all the chance he wishes; but we shall not open our columns to a merc the condition imposed upon Mr. Armstrong in the outset, and we shall not abate it in favor of either.

A THOROGOR POLITICIAN.—The Appleton Crescent says of Dr. Stoddard Judd, of Dodge co., "this gentleman-a democrat in '37, a conservative in '38, a whig in '40, a Tylerite in '42, a Clay whig in '44, a Polk democrat in '441, a whig in '45, a tad democrat in '46, a hunker nocrat in '47, a free soiler in '48, a Doty man in '50, a compromise democrat in '52, and an anti-Nebraska democrat in '54—is said to be a candidate for the democratic nomination for congress." The most comprehensive and appropriate name ever applied to the worthy doctor was given him by Mr. Brace, of Prairie du Chlen. when both were members of the constitutional convention. The title then applied was a "ro tary democrat," and no subsequent name could be an improvement upon it.

The Milwaukee News, after a suspension of a week or two, appears in a new dress and under new management. The new publishers and editors are Messrs. G. W. Clason and C. F. Huntsnan, who retain Mr. Shaw, the late editor, as an The introductory address indicates a radical and commendable change in its former character, if the following promises are kept:

We shall advocate every enterprise, public and private, having a tendency to promote the interest of our thriving and populous city; and in doing this, we shall also seek the prosperity of the state at large; for whatever tends to

promote the one, will equally enhance the interest, the happiness and wealth of the other.

To our editorial brethren, we cordially extend the right hand of fellowship. In our intercourse it shall be our faithful endeavor to cultivate feelings of kindness by discussing fairly every question that comes before us, without descending to low personalities.

UNLOADING A LOCOMOTIVE.—The Wisconsin engine, by which it is raised to the proper run off as easily as you please.

The Watertown Register says that Messrs. Bishop and Stewart have thrown up their contract on the Watertown and Milwaukee rail-

says that neither the Madison Journal or Argus are right in their statements as to the extent of inking of the railroad track near that village. and adds that "the track has fallen about eight feet, and lies six feet under water, for a space out 140 rods, the superstructure having sunk and forced up the earth on each side .-The detention of crossing, and the cost of filling up are the only inconvenience and expense."

A GRANT OF LAND FOR THE IMPROVEMENT .-The Fond du Lac Herald has the following: We have just been shown a letter from I. P. Walker to the improvement company, stating that a bill making an additional grant of about 100,000 acres of land in aid of the Fox and Wisconsin river improvement, has passed both branches of congress and become a law. This grant is designed to cover the deficiency in the original grant, caused by different Indian reservations and private land claims.

This is the third bill of the kind which Mr. Walker has succeeded in piloting through the senate; all previous ones, however, were lost in the house. This one, it seems, through the cuergy and perseverance of Mr. Eastman, of house, has succeeded. This places the company in a cituation to push the improvement along to completion as fast as men and means

A BARREN MARKET.—Eggs are so scarce and in such good demand, that 14 cents per dozen is paid for them out of the wagons. Not a pound of fresh butter can be got for less than 16 cents per lb. Spring chickings are highly desirable and marketable article. Nearly as much is paid for a nice fat lamb as for an old sheep—hardly has one been seen in the market this summer.

THE DROUGH IN NEW YORK AND THE SOUTH-WEST.—One of the N. Y. Tribune's reporters having recently visited Northern New York, states that in St. Lawrence and Jefferson counties, the drouth is worse there than in the two years past, when they have been burned up.— Hay \$10 to \$12 a ton in the field and scarce at that. Cows were selling for \$8, owners seeing no probability of providing food for them. The farmers are emigrating in large numbers from this part of New York, to Wisconsin, Illinois

If the farmers of Wisconsin would realize how signally they have been favored by Providence during the current season, they have only to read the accounts of the great drouth in the adjoining states of Illinois and Indiana. It is represented to be beyond all precedent. Almost the entire corn and potatoe crop, the Central Illinois papers say, is already ruined. In the opinion of the Tribune, the worst of it is that the more the country is settled, the oftener these killing drouths will occur.—Wis.

THE BRITISH FLEET IN THE BALTIC .- Admiral Berkeley recently made the following interesting statements in the House of Commons concerning the prosecution of the war with Russia. They were in reply to some statements

of Lord Dudley Stuart: Admiral Berkeley said he could assure the to send out gunboats as he could be, but the mat-ter was not so easy a one as the noble lord cemed to think. The noble lord had been ased to say that if 20 of these vessels were ent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from llant officer who conducted operations in Baltic: and as he had served with that officer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear.] Sir Charles Napier said that it was not in his power to do anything with the powerful fleet which he had—and he need not tell the House that when the gallant admiral penned these words he was chafing like a lion in his den, but that to attack Cronstadt or Sveaborg would be certain destruction. [Hear.] And what said Admiral Chads the most scientific officer in all that related to naval gunnerry of the present day. He said that after two days' inspection of the forts and the ships, he found that the forti-fications were far too substantial to make any mpression upon, and that it would be useless to direct the fire of the ships against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at them. [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet, and whose business it was to see that no vessel was without everything which was required.— Admiral Seymour said that he had never been at any time in want of anything—thanks to the provident measures adopted by the admiralty. Cheers.] But the worst statement of all was that with which the noble lord, the member for Marylebone, wound up his remarks, to the effect that the flecets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite tht have been taken before this time had the means by the government, and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared—it being his duty to draw up the orders to the admirals—there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt. SLAVERY IN INDIANA .- The phenomena of

northern servility to the south upon supposed reasons of self-interest, are myriad-headed.— From the time when a New York mercantile house was able to excite animadversion by the affirmation that " they sold their goods and not their 'principles,'" such was the circle of base-ness that surrounded their independence to the last hotel-puff of arrivals from the south-not going beyond this period—we can find examples, prominent and comprehensive, of northern servility enough to make a sensitive soul ashamed gives the operation of taking a locomotive from | that it ever knew being. A fresh evidence of the deck of a vessel to the ground. A tempo-Indianapolis railroad is chiefly beld in Louisville, rails on the dock to the side of the vessel, an Ky., though the road is in Indiana, a free state, dication is made of "the screws" under the so-called. The direction being thus controlled in a slave state, has established a rule that eveheight, rails are laid un der the wheels, and it is himself free! Papers are not sufficient, no matter how well authenticated, but a passport is required from some well-known resident of Jeffer-sonville, before any black can travel by the road! By means of this rule, submitted to in act on the Watertown and Milwaukee railact on the Watertown and Milwaukee ra It has no peer in the other roads, except so far as the whole state is responsible. If Indiana wishes to have a reputation as a civilized state she will bring the slave-driving directors of that road to their senses, and insist upon the right of every man to travel by it unquestioned, until legally apprehended for crime or misdemeanor. So far as she admits such slave direction in her brother postmaster at San Francisco, and his affairs she adds one more impediment to the en-franchisement of the free states, all of which are sunk to the level of lacqueys and overseers by the infamous fugitive slave bill.—N. Y. Tri-

METEOROLOGICAL.-Mr. E. Merriam, a gentleman who is widely known as the "New York meteorologist," in a communication to the Jour-nal of Commerce, makes mention of the following facts, which will perhaps prove new to some

A thunder storm pursues its own path inde-pendent of the wind, and travels the same path often, and again and again, as the records of the death of persons killed by lightning, and objects struck by lightning, bear witness.

For many years, we have, by the aid of associate observers, made thermometrical, meteorological and kindred observations, upon the continent and upon the ocean, at every point of the compass, and have the accurate means of mea-suring the velocity with which heat and cold travel over the surface.

In December, 1851, the cold came north from Tennessee, independent of wind, and in April, 1854, the heat came from the northwest, independent of wind. Our observations made in Tennessee, and Canada, and at points interme

diate, determine this.

What falls from a cloud, whether hail or snow, or rain, in the quantity and temperature, affect, to a greater or less extent, the temperature of If a current of wind was turned downward,

Charles Lamb hit the hydropathists when he said—"Water cure was as old as the deluge, only that the first great application happened to kill more than it cured,"

BONBS PLENTY, CASH WANTING .- We learn by a dispatch from Washington, which we publish among our telegraphic news this morning, that the administration have refused to pay a small sum of money for which their late emba sador to Central America made himself and the government responsible at San Juan. Our readers will remember that after that eminent di-Admiral Berkeley said he could assure the plomatist had accomplished his successive labors noble lord that the government were as anxious of abetting if not instigating the killing of Antonio, repelling the officers who came to arrest the actual homicide, assuring the citizens of San Juan that they were the "offscouring of hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fabens for volunteers to burn the town, and final by rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, this guard was left there on pay, and though Borland had pledged his embassadorial responsibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these circumstances there was nothing to do but borrow, and accordingly Mr. Fabens, the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the houne of the brave. Mr. Wood, probably because he was a democrat and a great admirer of General Picree, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's draft on the government at Washington. It now seems that this draffell due on last Monday, and was protested—Messrs. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. They can attack and destroy defenceless towns in compliance with the desires of Mr. Bottand and Mr. Fabens, but they can't return a thorsand dollars which those functionaries have borrowed for the public service from a too confiding third party. This seems to be an appropriate finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons homeless by their great exploit, there is a splending the complete of the complete of the propriety in cheating a simple merchant out of a thousand dollars. What a glorious administration is that we are blessed with!—N. Y. Tribune. hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fa-

THIS Company is one of the oldest, and among the most predently and successfully conducted in the country. The primary object in conducting its business has been to provide perfect security under all conceivable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is observed. economy is observed.

economy is observed.

Every insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium.

The directors are required to be pecuniarily interested in the company, and they give it their personal attention; and bonds of sufficient security are given by its officers for the faithful performance of their duties.

Highly Important to Farmers.

THE ONLY EXCLUSIVE FARMERS INSURANCE COMPANY IN THE WEST, THE MADISON MUTUAL,

LOCATED AT MADISON, WISCONSIN. PHIS Company continues to take risks upon

THIS Company continues to take risks upon kinds, (belonging to furmers,) household furniture, grain in barns, live stock, &c., from one to five years, at lower rates than most other responsible companies.

All losses promptly paid at the office as soon as proof is made thereon.

We believe it to be for the interest of the farmers to insure by themselves, their property being less hazardous than any other, consequently you will have to losses only your own of the same class, and all will be on an equal footing.

Experience has shown that two-thirds, if not three-fourths of all the fires that occur are upon stores, tweerns, mills, shops and such like property. In this company all such property is rejected positively, by letting them alone.

Farmers, look to your own interest, and insure in a Farmers' Company.

We have been doing business a little over three years, and we have not been obliged to assess our premium notes, and for the last fourteen months we have not had a single dollar loss, though doing a large and prosperous business, which we believe to be without a parallel in the history of insurance.

THE RIGHT MATERIAL.—The emigrants who have been sent out by the Kansas emigration society appear to be men of the true stamp—fearless and bold. The Rochester Union tells a good story of these emigrants. The reward of-fered for the head of Eli Thayer, seems to have stimulated them to even a more defiant attitude:

Kansas Pioneer Party.—Letters have been received from Kansas pioneer party. They all arrived safe at the mouth of the Kansas river, on the 29th of July, only ten days from Rochester. They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missour Argus publishes an account of a meeting, offering a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

Lucian Barbour is the anti-Nebraska candidate for congress, in the Indianapolis district, of Indiana. Mr. Barbour has always been an old-line democrat until the democracy engrafted the Nebraska swindle into their creed and kicked out of their party every body who would not swear by this iniquity. He was nominated by a people's convention, and will receive the hearty support of all the opponents of slavery in his district.

ACCIDENT.—A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurora, and had been in the western country but a short time, having emigrated from N. H. -Journal.

Mr. Edward C. Delavan states that during the cholera season of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that out of those 100 men not one died of cholera, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a British seaman, now serving under Napier describing a skirmish:

"Every man on board volunteered, so the captain picked a crew, and I was sent ashore with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the —, what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear them showed an advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He fell like a stone. At the about sixty yards. He fell like a stone. At the same time a broadside from the —— went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must clean. [jy11] HOLDEN, KEMP & CO. could scarce tell how. I felt as though I must go up to see him whether he was dead or alive.

He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on more than nive and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and did not look like an enemy. What I felt I never can tell, but if my life would have saved his I believe I should have given it. I laid his head on my knee, and he grasped hold of my hand and tried to speak, but his voice was gone. I could not tell a word he said, and every time he tried to speak the blood pourout so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it

for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from the —— to order us aboard, and that aroused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to the wood where the enemy was concealed—poor fellow, he little thought that I had shot him down. I was wondering how I could leave him to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehow thought of everything I had heard about the Turks and the Russians and the rest of them; but all that seemed so far off and the dead man

NEW GOODS! \$15,000 Worth of BOOTS AND SHOES JUST RECEIVED AT THE

AM now receiving one of the largest and finest stocks of Boots and Shoes that I have ever before brought to Janesville, and what is finer than all the rest, I can sell them at lower prices than I have ever sold before, notwithstanding the great advance in the Eastern Market. My assortment of

Wisconsin Boot & Shoe Store.

Ladies Fine Shoes, ... in particular, I have no hesitation in saying cannot be equaled in the State, both for style and durability, being all made to order, and in such a manner that I can warrant every article I sell, with the understanding at all times, that if they do not come up to the warrant, they shall be mended free of charge.

GENTLEMEN'S WEAR. In this line I know beyond a doubt that I can show you a finer assortment and at better prices by twenty-five per cent. than can be found at any of the side shops or Dry Goods stores about town. I want it distinctly understood that I make the BOOT AND SHOE TRADE my WHOLE STUDY, and that I Buy More, Sell More and know more about the trade, than the whole pile of petty dealers put together. And I know also that I can make it an object for Every Farmer in Book County, as well as every one that trades in Janesville to buy their Boots and Shoes of me for the more I sell the smaller profits I can sell at.

Manufacturing. I want to say a few words to you in regard to my Manufacturing Department, to wit: That I am now engaged more extensively in the manufacturing business, and probably am selling more custom work than all the shops about town put together, simply for these reasons—that I use better Stock, being entirely of Eastern tannage, which every one knows is worth twenty-five per cent more than the common western tanned leather; and what is a better reason and of greater importance. I can

Sell my Castom Work at Much Lower Prices. and at the same time sell you a better article than you can get at the shops, for this reason, which you must all see is a very palpable one, that in buying my stock cast and in such large quantities, I of course save a very large per cent, and thereby can sell at lower prices and at the same time make my profits.

I want to state further that I have secured the services of Mr. Ruckykeham, who has formerly been engaged.

res of Mr. Buckingham, who has formerly been engaged in the manufacturing business on the west side of the River, and who is known by every one to be the best manufacturer in the city; and if we don't get you up a better article, both in regard to style and durability, we will forfeit our money and our reputation, and I pledge you my word that this is no small forfeit. Leather and Findings. I have just received over \$3,000 worth of the very best brands of Eastern Sole & Upper Lenther; also, a very large assortment of FRENCH and PHILADELPHIA KIP and FRENCH CALF SKINS, to-

gether with a full assortment of MOROCCOS of every kind, which I will sell at Precisely Milwankee and Chicago Prices. I have constantly on hand, also, a large assortment of all kings of FINDINGS, LASTS, BOOT TREES, CRIMPS, itc., etc., all of which will be sold at the same rates.

I request the attention of manufacturers in town as well as in the country to my stock, as I think I can make it an object for you to buy of me. At least, I can sell you a much superior article to that which you get of the pedlers.

TO THE LADIES, I would say that I am under very great obligation for the partiality you have shown me, in always procuring your understandings from me, and I now publicity promise and swear that I will make every one of you who may be entitled to the same a present of a handsome pair of CACES, when I shall have closed up my shocaelling career. I would say further, that I am prepared to get up to order any style of work you wish, at low rates.

THURSSDAY MORNING, AUG. 17, 1854.

We have received a note from Mr. Noggle in relation to the publication of his oration at Fulton now in progress in our columns, which is of a character for which there is thus far no provocation. If Mr. Noggle has any explanations or denials to make in the matter, or wishes to criticise the literary productions of Mr. Armstroog, he shall have all the chance he wishes: but we shall not open our columns to a mere personal, vituperative controversy. This was the condition imposed upon Mr. Armstrong in the outset, and we shall not abate it in favor of

A THOROUGH POLITICIAN.—The Appleton Crescent says of Dr. Stoddard Judd, of Dodge co., "this gentleman—a democrat in '37, a conservative in '38, a whig in '40, a Tylerite in '42, a Clay whig in '44, a Polk democrat in 1444, a whig in '45, a tad democrat in '46, a hunker democrat in '47, a free soiler in '48, a Doty man in '50, a compromise democrat in '52, and an anti-Nebraska democrat in '54-is said to be a candidate for the democratic nomination for congress." The most comprehensive and appropriate name ever applied to the worthy doctor was given him by Mr. Brace, of Prairie du Chlen, when both were members of the constitutional convention. The title then applied was a "ro tary democrat," and no subsequent name could be an improvement upon it. '

The Milwaukee News, after a suspension of a week or two, appears in a new dress and under new management. The new publishers and editors are Messrs. G. W. Clason and C. F. Huntsman, who retain Mr. Shaw, the late editor, as an associate. The introductory address indicates a radical and commendable change in its former character, if the following promises are kept:

We shall advocate every enterprise, public and private, having a tendency to promote the interest of our thriving and populous city; and in doing this, we shall also seek the prosperity of the state at large; for whatever tends to promote the one, will equally enhance the interest, the happiness and wealth of the other.

To our editorial brethren, we cordially extend the right hand of fellowship. In our intercourse it shall be our faithful endeavor to cultivate feelings of kindness by discussing fairly every question that comes before us, without descending to low personalities.

UNLOADING A LOCOMOTIVE.—The Wisconsin gives the operation of taking a locomotive from the deck of a vessel to the ground. A temporary inclined plane of timber is raised from the rails on the dock to the side of the vessel, an application is made of "the screws" under the engine, by which it is raised to the proper height, rails are laid under the wheels, and it is run off as easily as you please.

The Watertown Register says that Messrs. Bishop and Stewart have thrown up their contract on the Watertown and Milwaukee rail-

The Wisconsin of Tuesday afternoon says that neither the Madison Journal or Argus are right in their statements as to the extent of the sinking of the railroad track near that village, and adds that "the track has fallen about eight feet, and lies six feet under water, for a space of about 140 rods, the superstructure having sunk and forced up the earth on each side .--The detention of crossing, and the cost of filling up are the only inconvenience and expense."

A GRANT OF LAND FOR THE IMPROVEMENT. The Fond du Lac Herald has the following: We have just been shown a letter from I. P. Walker to the improvement company, stating that a bill making an additional grant of about 100,000 acres of land in aid of the Fox and Wisconsin river improvement, has passed both

vations and private land claims.

This is the third bill of the kind which Mr. Walker has succeeded in piloting through the enate; all previous ones, however, were lost in the house. This one, it seems, through the energy and perseverance of Mr. Eastman, of the house, has succeeded. This places the company in a situation to push the improvement. along to completion as fast as men and means

THE DROUTH IN NEW YORK AND THE SOUTH wast.—One of the N. Y. Tribune's reporters having recently visited Northern New York, states that in St. Lawrence and Jefferson coon ties, the drouth is worse there than in the two years past, when they have been burned up.— Hay \$10 to \$12 a ton in the field and scarce at that. A CONTRACT WAY

THE BRITISH FLEET IN THE BALTIC .- Admiral Berkeley recently made the following interesting statements in the House of Commons, concerning the prosecution of the war with Russia. They were in reply to some statements of Lord Dudley Stuart:

Admiral Berkeley said he could assure the noble lord that the government were as anxious to send out gunboats as he could be, but the matter was not so easy a one as the noble lord seemed to think. The noble lord had been pleased to say that if 20 of these vessels were sent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from the gallant officer who conducted operations in the Baltic; and as he had served with that officer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear:] Sir Charles Napier said that it was not in his power to do anything with the powerful fleet which he had—and he need not tell the House that when the gallant admiral penned these words he was chafing like a lion in his den, but that to attack Croustadt or Sveaborg would be certain destruction. [Hear.] And what said Admiral Chads the most scientific officer in all that related to naval gunnerry of the present He said that after two days' inspection of the forts and the ships, he found that the forti-fications were far too substantial to make any impression upon, and that it would be useless to direct the fire of the ships against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet, and whose business it was to see that no vessel was without everything which was required.—Admiral Seymour said that he had never been at any time in want of anything-thanks to the provident measures adopted by the admiralty. [Cheers.] But the worst statement of all was that with which the noble lord, the member for Marylebone, wound up his remarks, to the effect that the ficcets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite means by the government, and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared—it being his duty to draw up the orders to the admirals—there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt. SLAVERY IN INDIANA .- The phenomena of

northern servility to the south upon supposed reasons of self-interest, are myriad-headed. From the time when a New York mercantile house was able to excite animadversion by the affirmation that "they sold their goods and not their 'principles,'" such was the circle of baseness that surrounded their independence to the last hotel-puff of arrivals from the south—not going beyond this period—we can find examples, prominent and comprehensive, of northern ser vility enough to make a sensitive soul ashamed that it ever knew being. A fresh evidence of this servility has now come to our knowledge. It seems that the stock of the Jeffersonville and Indianapolis railroad is chiefly beld in Louisville. Ky., though the road is in Indiana, a free state, so-called. The direction being thus controled in a slave state, has established a rule that every colored person traveling thereby, shall prove himself free! Papers are not sufficient, no matter how well authenticated, but a passport is required from some well-known resident of Jeffer sonville, before any black can travel by the road! By means of this rule, submitted to in a free state with a degree of servility not exceeded by a slave outright, we are informed that freemen of color have been seized, taken to Kentucky, imprisoned and whipped, until their freedom could be proved. In the practice of this rule, the railroad in question stands alone. It has no peer in the other roads, except so far as the whole state is responsible. If Indiana wishes to have a reputation as a civilized state she will bring the slave-driving directors of that road to their senses, and insist upon the right of every man to travel by it unquestioned, until legally apprehended for crime or misdemeanor So far as she admits such slave direction in her affairs she adds one more impediment to the enfranchisement of the free states, all of which are sunk to the level of lacqueys and overseers by the infamous fugitive slave bill.—N. The Post seems astonished that men differing materially from each other should units in op-posing the national administration. But this is only the natural operation of fixed laws. When our administration becomes so degraded that none but its hired presses can defend it; or so corrupt as to alarm, the community generally, we may naturally expect that men of different views will unite to save the country from destruction—just as men will unite against a common enemy .- Boston Atlas.

Bones plents, Cash Wanting.—We learn by a dispatch from Washington, which we publish among our telegraphic news this morning, that the administration have refused to pay small sum of money for which their late embas sador to Central America made himself and the government responsible at San Juan. Our rea-ders will remember that after that eminent diplomatist had accomplished his successive labors of abetting if not instigating the killing of Anthe actual homicide, assuring the citizens of San Juan that they were the "offscoming of hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fabens for volunteers to burn the town, and finally rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, was left there on pay, and though Borland had pledged his embassadorial responsibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these circumstances there was nothing to do but borrow, and accordingly Mr. Fabence the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the home of the brave. Mr. Wood, probably because he was a democrat and a great admirer of General Pierce, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's draft on the government Washington. It now seems that this draft fell due on last Monday, and was protested .--Messis. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. They can attack and destroy defenceless towns in compliance with the desires of Mr. Borland and Mr. Fabens, but they can't return a thonsand dollars which those functionaries have borrowed for the public service from a too confiding third party. This seems to be an appropriate finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons homeless by their great exploit, there is a splendid propriety in cheating a simple merchant out of a thousand dollars. What a glorious administration is that we are blessed with!-N. I.

THE HABEAS CORFUS CASE,-We give to-day Chief Justice Whiton's opinion on the second application of S. M. Booth to be discharged from the custody of the U. S. marshal. We think the correctness of the decision and the distinction between this and the former case are so clear that "the way faring man" cannot fail to see them. And we think, moreover-(whatever criticisms may be passed upon these 'decisious, by men with or without legal attainments. on the one hand and the other,) that Wisconsin has a reason to be proud of her supreme bench. for its impartiality, its firmness and eminent ability and learning.—[Wisconsin Patriot, (dem.)

City Mills .- We are informed that the mills, in the second ward, are all still idle, not being able, as yet, to get any grain to grand. Last year, earlier than this, the mills were in operation, and our market was plentifully supplied with new flour. The great difficulty of obtaining help has caused the harvest to continue some two or three weeks later than it otherwise would have done, and, consequently, new wheat does not make its appearance in our market as early as usual.—Free Democrat.

The Nebraska orators in Indiana have " hard road to travel." The Lafayette Journal says: Holman, the democratic candidate for congress, in the fourth district, recently made a speech at Milan, Ripley county, to three or four hundred people. After he had finished, a vote of thanks was taken on the Nebraska bill and only one solitary individual voted in his favor. Poor Holman, we imagine, must have felt dis-tressingly lonesome in that crowd.

NIP AND TUCK.—The Niagara Falls Iris says that a slave escaping from servitude, arrived in that village on Tuesday evening, and reached the ferry just in time to get into the little boat as it was preparing to leave for the Canada side. His master was on the same train in pursuit, and reached the ferry only in time to see his chattel midway across the foaming waters of the Niagara. The slave was last seen by the master at Cleveland ; yet although both were on the same train, the fugitive succeeded in cluding his vigi-lance, and placing bimself beyond pursuit.

Six AT ONCE .- A German woman in a one horse wagon, passed through this city on Tuesday, going from her residence a few miles west of town on a visit to her husband, who had been taken sick at the place where he was working in the country east of town. She had with her in the wagon, snugly propped up in a wine bas-kst, six childeen, all the product of one birth. They were not much bigger than an apple dumpling, but seemed to be wide awake and kicking. They were six months old, all boys, and all as near of a size as possible, except the runt of the party, which is described as being the smallest mortal of its age ever seen.

We state this case with serious misgivings of its truth, relating it as it came to us at second hand from an eye-witness-a lady of character in this city, who saw and counted the children and had the mother's word that they were all hers at a single birth.—Dayton Gazette.

EMPIRE CASH STORE The Cheapest Store in the County.

THE LARGEST, Most General and Rest Selected Stock of MERCHANDISE ever introduced to the people of Rock and the adjoining counties is now received at the EMPIRE CASH STORE.

A Stock larger than any Two Stores in Janesville to be Sold for CASH, at prices that all can see are at least 25 per cent lower than the PRETNDED CASH STORES SELL FOR. We mean what we say exactly: We can sell you

MORE GOODS FOR THE

Least amount of Money Than any other Store in the county. For this reason we sell more Goods than any two Stores in Janesville, and this year we intend to sell more than any three, consequantly, we can rell just one-third cheaper, as our expenses are no more by selling so much than they would be did we not sell any more than our neighbors. Reduce The Price and Increase the Speed

Is the order of the day; and in order to do so, we have purchased this spring larger than ever, and intend to sell at prices to astonish everyboby.

We buy Goods to SELL, and intend everybody shall understand this by our prices. We have purchased every thing by the Cord in the way of Sacrebandise. Our Stock embraces every thing in the Goods line, kept in such a story as ours only, commencing with

DRY GOODS, GROCERIES, CROCKERY, HARDWARE in connection with a gen-eral STOVE TRADE. READY-MADE CLOTHING,

BOOTS and SHOES, HATS, BONNETS, RIBBONS and CAPS, &. &c.,
To enumerate which would be impossible, (any one seeing our stock will be satisfied of that). All we have to say is we have JUST WHAT YOU WANT, AT PRICES TO SUIT YOU, a fact which all can see by calling at the EMPIRE CASH STORE.

KHER'S ROCK OIL.

ROM a Well 400 feet deep, Near Pittsburgh,
Pa., is offered to the public as a Natural Medicine
of no common value. It is a different thing from the old
Kentucky or American Oil, as this is used INTERNALLY
as well as externally. As a local remedy in Paralysis,
Piles, Rheumatism, Deafness, Loss of Sight, Burns, &c.
—abo, as a valuable Internal Remedy for Piles, Ague,
Scrofula, Coughs, Diarrhora, Erysipelas, old Sores, Eruptions of the Skin, Female Diseases, Worms, Bladder and
Kidneys, Bronchitis, Pains &c. &c., it invites the investigating Physician, as well as the suffering patient, to
Decome acquainted with its merits.

Discovered in 1849, it has within 2 or 3 years, made
multitudes of cures, and multitudes of friends—and as
roon as tries the Sales not only increase but hold out.
Testimony to its great merit is constantly accumulating
in the hands of the proprietor by certificates, letters,
and in other ways.

and in other ways.

FT DOCTORS THE WHOLE MAN—flesh and blood

The poctors the whole Man—flesh and blood—skin and bones—from head to foot—how it acts upon the system—upon diseases of different manifestations, we cannot fully tell. While it is both cathartic and astringent, it is Alterative—and mind you, a REGULATOR. A leading principle in it is Naptha. When you once have it in the family you will not be without it.

Full as the world is of Patent Medicines—it is thought not best to suppress this, the work of NATURE—to make room for Human inventions. Price 50 cents per bottle. It can be had of wholesalers at the large cities and towns in the West at Proprietor's prices.

HAVE WE AGUE AMONG US?—A tea spoonful every three hours in the absence of the fever will cure you of Ague or Diarrhea. Em Physicians, Druggists, and all friends of the afflicted, will do well to recommend this Oil for PROLAPSUS UTERI, and good will be done—take the usual dose 2 or 3 times a day, and bathe the lower part of the back with it. Have you SCROFULA? The Petroleum will eradicate it, root and branch, at little cost or inconvenience. Get circulars of directions for adults and children, gratis of the agents. A trial is all we ask. Mind and get the right kind—it is of a beautiful reddish color and clear. Try it for Piles.

1000 Dollars Reward WILL be given to any person—Physician or otherwise—who will perform a cure as quickly and permanently, by any means whatever, of any of the following diseases, as can be done by the use of

PULVERMACHER'S Nervous Headache

Painful and Swelled Joints, Palpitation of the Heart, Sciataca, General Debility, Female Diseases, Neuralgia of the Face, Rheumatic Pains of the Spinal Disease Deafness, Blindness,

Dyspepsia, Indigestion, Chest
ALL NERVOUS DISEASES Are almost instantly removed by the simple application of the Electric Chains, which are constructed so as to be worn next to the skin, producing a constant current of uninterrupted Electro-Magnetism, which within the last few years has been discovered to possess STRANGE and WONDERPUL POWER, in the INSTANT RELIEF and PERMANENT CURE of nervous diseases.

HISTORY. Pulvermachers' Chain are presented to the public, as the most scientific and convenient mode of applying this powerful agent. They have been secured by patent in France, (where they were invented) England, Germany, Austria, Belgium, and one year since introduced into the United States, and also secured by patent. They are used in every Hospital in the State of New York, and highly recommended by professors Valentine Mott, Van Buren, Post, Carnochan, of that city, who daily make use of them in their practice.

THE WORLD IS CHALLENGED to produce so many well authenticated certificates of cure, not only from intelligent patients, but from scientific Physicians. The sale now in New York is perfectly ASTONISHING, and thousands who visit the Crystal

ly ASTONISHING, and thousands who visit the Crystal Palace where they are on exhibition, seldom fail to obtain a chain before they leave the city.

Thanks be to the common sense of the people who are beginning to become disgusted with the practice of making a Drug Shop of their stomach—swallowing bottle after bottle of slekening, disgusting trash, having no more effect in even relieving, much less curing, the disease for which they are recommended, than a Poor Man's Plaster applied to the top of the head would have in curing an infant of worms.

All these great and remarkable discoveries, by which every ill "which flesh is heir to" is eradicated from the earth—strange as it may seem—are made by men who are too ignorant to obtain a living by any other mode, and their knowledge of disease, its proper mode of cure, its cause, is just as extensive as an Arab's is of the mechanism of a steam engine. No intelligent person will deny the truth of this, and no Physician dare risk his reputation as an honest man, and declare that nervous reputation as an honest man, and declare that nervous diseases are not more frequently increased in severity than relieved, by the old antiquated way of giving medicine into the stomach. If people will only become sensible and think for themselves, and believe that physicians practice upon their credulity more than they have any idea of, pay strict attention to temperance in all things, (which means very much,) make free use of pure cold water, internally and externally, with an occasional dash of soap, sleep in freely ventilated rooms, retire early and rise early, be happy and cheerful, employ their physicians to tell them "they require no physic;"—by so doing health and happiness will increase, bottled molasses and water be at a discount, and its famous discoverers be consigned to their legitimate stations.

IN pursuance of a decretal order of the circuit court for Rock county in equity, made in the above entitled cause on the ninth day of June, A. D. 1854, will be sold, by and under the direction of the sheriff of Rock county, at public auction, at the court house in the city of Janesville, in said county, on the 7th day of September, A. D. 1854, at ten o'clock in the forencon, all that certain piece, parcel or tract of land situate, lying and being in the village (now city) of Janesville, in the county of Rock, and state of Wisconsin, and known and distinguished as lot number sixty-seven, (67) in Smith and Bailey's addition to Janesville, according to the recorded plot of the same. A GRANT OF LAND FOR THE IMPROVEMENT,-The Fond du Lac Herald has the following: We have just been shown a letter from I. P. THE BRITISH FLEET IN THE BALTIC .-- Admiral Berkeley recently made the following interesting statements in the House of Commons, concerning the prosecution of the war with Russia. They were in reply to some statements of Lord Dudley Stuart:

Admiral Berkeley said he could assure the noble lord that the government were as auxious to send out gunboats as he could be, but the matter was not so easy a one as the noble lord seemed to think. The noble lord had been pleased to say that if 20 of these vessels were sent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from the gallant officer who conducted operations in the Bultic; and as he had served with that officer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear.] Sir Charles Napier said that it was not in his power to do anything with the powerful fleet that when the gallant admiral penned these words he was chafing like a lion in his den, but that to attack Cronstadt or Svenborg would be vertain destruction. [Hear.] And what said Admiral Chads the most scientific officer in all that related to naval gunnerry of the present day. He said that after two days' inspection of the forts and the ships, he found that the fortifications were fur too substantial to make any impression upon, and that it would be useless to direct the fire of the ships against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at them. [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet, and whose business it was to see that no vessel Admiral Seymour said that he had never been at any time in want of anything—thanks to the provident measures adopted by the admiralty. [Cheers.] But the worst statement of all was that with which the noble load, the member for Marylebone, wound up his remarks, to the effeet that the fleeets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite means by the government, and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared-it being his duty to draw up the orders to the admirals-there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt.

northern servility to the south upon supposed reasons of self-interest, are myriad-headed.— From the time when a New York mercantile house was able to excite animadversion by the affirmation that "they sold their goods and not their 'principles,'" such was the circle of baseness that surrounded their independence to the last hotel-puff of arrivals from the south-not going beyond this period—we can find examples, prominent and comprehensive, of northern servility enough to make a sensitive soul ashamed that it ever knew being. A fresh evidence of this servility has now come to our knowledge. ry colored person traveling thereby, shall prove himself free! Papers are not sufficient, no matter how well authenticated, but a passport is required from some well-known resident of Jeffersonville, before any black can travel by the road! By means of this rule, submitted to in a free state with a degree of servility not exceeded by a slave outright, we are informed that freemen of color have been seized, taken to Kentucky, imprisoned and whipped, until their freedom could be proved. In the practice of this rule, the milroad in question stands alone. It has no peer in the other roads, except so far as the whole state is responsible. If Indiana wishes to have a reputation as a civilized state she will bring the slave-driving directors of that road to their senses, and insist upon the right of every man to travel by it unquestioned, until legally apprehended for crime or misdemeanor. affairs she adds one more impediment to the enfranchisement of the free states, all of which are sunk to the level of lacqueys and overseers by the influeous fugitive slave bill .- N. BOMBS PLENTY, CASH WANTING .-- We learn by a dispatch from Washington, which we publish among our telegraphic news this morning, that the administration have refused to pay a small sum of money for which their late embas sador to Central America made himself and the government responsible at San Juan. Our readers will remember that after that eminent diplomatist had accomplished his successive labors of abetting if not instigating the killing of Antonio, repelling the officers who came to arrest the actual homicide, assuring the citizens of San Juan that they were the "offscoming of hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fabens for volunteets to burn the town, and finally rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, this guard was left there on pay, and though this guard was left there on pay, and though Borland had pledged his embassadorial responsibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks whose about the property of the propert which he had—and he need not tell the House Borland had pledged his embassadorial responeven supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these cheumstances there was nothing to do but borrow, and accordingly Mr. Fabens the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the home of the brave. Mr. Wood, probably because he was a democrat and a great admirer of General Pierce, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's deaft on the government at Washington. It now seems that this draft fell due on last Monday, and was protested .-Messis. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. They can attack and destroy defenceless towns in compliance with the desires of Mr. Borland and Mr. Fabens, but they can't return a thousand dollars which those functionaries have borrowed for the public service from a too confiding third party. This seems to be an appropriate finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons homeless by their great exploit, there is a splendid propriety in cheating a simple merchant out of a thousand dollars. What a glorious administration is that we are blessed with!-N. Y.

Kansas Pioneer Party.-Letters have been received from Kansas pioneer party. They all arrived safe at the mouth of the Kansas river, on the 29th of July, only ten days from Rochester. They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missouri Argus publishes an account of a meeting, offering a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

He was nom-inated by a people's convention, and will receive the hearty support of all the opponents of sh-Tery in his district.

Accident.—A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurors, and had been in the western country but a short time, having emigrated from N. II.

Mr. Edward C. Delayan states that during the cholera season of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that out of those 100 men not one died of cholera, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a Brit-ish seaman, now serving under Napier describing a skirmish:
"Every man on board volunteered, so the

captain picked a crew, and I was sent ashore with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the —, what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards but the broadside of the landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear while the boat's crew made prizes with the gnns. The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed an advance. We were ordered to fire. I took steady aim and fired on roy man at about sixty yards. He fell like a stone. At the same time a broadside from the —— went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must could scarce tell how. I felt as though I must go up to see him whether he was dead or alive. He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and sid not look like an enemy. What I felt I never can tell, but if my life would

have saved his I believe I should have given it. I laid his head on my knee, and he grasped hold of my hand and tried to speak, but his voice was gone. I could not tell a word he said, and every time he tried to speak the blood pouront so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from the —— to order us aboard, and that aroused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to was concealed poor fellow, he little thought that I had shot him down. I was wondering how I could leave him to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehow thought of everything I had heard about the Turks and the Russians and the rest of them; but all that seemed so far off and the dead man

AGAIN & AGAIN THE BOSTON STORE.

Let the Horn be Blown!!

"Sound the loud timbrel o'er land and o'er sea,"
WHEELOCK'S triumphant, and ever shall be. THIS is the middle of the nineteenth

A century, the first half of which has produced more change and onward movement than any fifty years of our Christian Era.

The great controlling power of this age is its com-merce—indeed, this may be truly called the commercial

age. It has been well said by an ancient writer that

WHEELOCK Annnounces to every people and every tongue, to both sexes and all parties, to all factions of all gauges, that finding his old store entirely

"Man wants but little here below,"

and to supply these wants

TOO SMALL! .. has been compelled, in order to be able to supply immense cull for goods at his establishment; to

Double the capacity of his Store Rooms! Having purchased this spring, for this market, to be \$39,007 00 Worth of Goods

But who can expect to read in the brief space of one life all the articles that the BOSTON STORE CONTAINS. Indeed, history must fail to give the searcher of nowledge any accurate idea of his immense

STOCK OF SUMMER GOODS,
His inimitable selection of Fancy Dress Goods:

10,000 Yards of Silk Bareges,

every style and price, and it is with no great diffi-alty that the fair damsels of this fair valley can select, FROM THE ONE THOUSAND PIECES,
Of all patterns and ranging in price from SIX CENTS
For Yard to Theorig-Eight Cents, such dresses as will
add to their exquisite beauty, though it may as a general thing, be as difficult to add to that beauty as it is
"to glid-refined gold, paint the flity, or add perfame to
the violet."

It must not be inferred that we offer only these and the many other articles for outer apparel, such as Cha-melion and Foulard Silks, but all manner of

Cotton, Grass & Linea Goods are on change, so that every one may be entirely ac-commodated with every article of female apparrel.— Eved French red foxed Gaiters, do do wolfed do do do wolfed do

JANESVILLE : : : WISCONSIN. THURSSDAY MORNING, AUG. 17, 1854.

We have received a note from Mr. Noggle in relation to the publication of his oration at Fulton now in progress in our columns, which is of a character for which there is thus far no provocation. If Mr. Noggle has any explanations or denials to make in the matter, or wishes to criticise the literacy productions of Mr. Armstrong, he shall have all the chance he wishes; but we shall not open our columns to a mere personal, vituperative controversy. This was the condition imposed upon Mr. Armstrong in the outset, and we shall not abate it in favor of

A THOROUGH POLITICIAN.—The Appleton Crescent says of Dr. Stoddard Judd, of Dodge co., "this gentleman-a democrat in '37, a conservative in '38, a whig in '40, a Tylerite in '42, a Clay whig in '44, a Polk democrat in '441, a whig in '45, a tad democrat in '46, a hunker democrat in '47, a free soiler in '48, a Doty man in '50, a compromise democrat in '52," and an anti-Nebraska democrat in '54-is said to be a candidate for the democratic nomination for congress." The most comprehensive and appropriate name ever applied to the worthy doctor was given him by Mr. Brace, of Prairie du Chien, when both were members of the constitutional convention. The title then applied was a "ro tary democrat," and no subsequent name could be an improvement upon it.

The Milwaukee News, after a suspension of a week or two appears in a new dress and under new management. The new publishers and editors are Messrs. G. W. Clason and C. F. Huntsman, who retain Mr. Shaw, the late editor, as an associate. The introductory address indicates a radical and commendable change in its former character, if the following promises are kept:

We shall advocate every enterprise, public and private, baving a tendency to promote the interest of our thriving and populous city; and in doing this, we shall also seek the prosperity of the state at large; for whatever tends to promote the one, will equally enhance the interest, the happiness and wealth of the other.

To our editorial brethren, we cordially extend the right hand of fellowship. In our intercourse it shall be our faithful endeavor to cultivate feelings of kindness by discussing fairly every question that comes before us, without descending to low personalities.

UNLOADING A LOCOMOTIVE.-The Wisconsin gives the operation of taking a locomotive from the deck of a vessel to the ground. A temporary inclined plane of timber is raised from the rails on the dock to the side of the vessel, an application is made of "the screws" under the engine, by which it is raised to the proper height, rails are laid under the wheels, and it is run off as easily as you please.

A GRANT OF LAND FOR THE IMPROVEMENT .-The Foud du Lac Herald has the following: We have just been shown a letter from I. P. Walker to the improvement company, stating that a bill making an additional grant of about 100,000 acres of land in aid of the Fox and Wisconsin river improvement, has passed both branches of congress and become a law. This grant is designed to cover the deficiency in the original grant, caused by different Indian reservations and private land claims.

This is the third bill of the kind which Mr Walker has succeeded in piloting through the senate; all previous ones, however, were lost in the house. This one, it seems, through the energy and perseverance of Mr. Eastman, of the house, has succeeded. This places the company in a situation to push the improvement along to completion as fast as men and means can do it.

THE DROUTH IN NEW YORK AND THE SOUTHWEST.—One of the N. Y. Tribune's reporters having recently visited Northern New York, states that in St. Lawrence and Jefferson counties, the drouth is worse there than in the two rears past, when they have been burned up and Hay \$10 to \$12 a ton in the field and scarce adno probability of providing food for them. If the farmers of Wisconsin would realize how signally they have been favored by Providence during the current season, they have only to read the accounts of the great drouth in the adjoining states of Illinois and Indiana. It is represented to be beyond all precedent. Almost the entire corn and potatoe crop, the Central Illinois that Illinois papers say, is already ruined. In the opinion of the Tribune, the worst of it is that the more the country is settled, the oftener these killing drouths will occur.— Wis.

THE BRITISH FLEET IN THE BALTIC .- Admiral Berkeley recently made the following interesting statements in the House of Commons,

of Lord Dudley Stuart: Admiral Berkeley said he could assure the noble lord that the government were as anxious to send out gunboats as he could be, but the matter was not so easy a one as the noble lord seemed to think. The noble lord had been pleased to say that if 20 of these vessels were sent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from the gallant officer who conducted operations in the Baltic; and as he had served with that officer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear,] Sir Charles Napier said that it was not in his that when the gallant admiral penned these words he was chafing like a lion in his den, but that to attack Cronstadt or Sveaborg would be certain destruction. [Hear.] And what said Admiral Chads the most scientific officer in all that related to naval guinerry of the present He said that after two days' inspection of the forts and the ships, he found that the fortifications were far too substantial to make any impression upon, and that it would be useless to direct the fire of the sbips against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at them. [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet, and whose business it was to see that no vessel was without everything which was required .-Admiral Seymour said that he had never been at any time in want of anything-thanks to the provident measures adopted by the admiralty. Cheers. But the worst statement of all was hat with which the noble lord, the member for Marylebone, wound up his remarks, to the (ffeet that the fleeets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite means by the government and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared-it being his duty to draw up the orders to the admirals-there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt.

SLAVERY IN INDIANA .- The phenomena of northern servility to the south upon supposed reasons of self-interest, are myriad-headed.— From the time when a New York mercantile nouse was able to excite animadversion by the allirmation that "they sold their goods and not their 'principles,'" such was the circle of baseness that surrounded their independence to the last hotel-puff of arrivals from the south-not going beyond this period -- we can find examples, rominent and comprehensive, of northern servility enough to make a sensitive soul ashamed that it ever knew being. A. fresh evidence of this servility has now come to our knowledge. It seems that the stock of the Jeffersonville and Indianapolis railroad is chiefly held in Louisville, Ky., though the road is in Indiana, a free state, so-called. The direction being thus controled in a slave state, has established a rule that every colored person traveling thereby, shall prove himself free! Papers are not sufficient, no matter how well authenticated, but a passport is required from some well-known resident of Jeffersonville, before any black can travel by the road! By means of this rule, submitted to in a free state with a degree of servility not excocod by a skew outright, we are informed that fromem of color have been seized, alken to Kettucky, imprisoned and whipped, until their freedom could be proved. In the practice of the committee, when first demanded by the freedom could be proved. In the practice of the state of the committee, when first demanded by the freedom could be proved. The Post seems astonished that men differing that. Cows were selling for \$8, owners seeing materially from each other should unite in opposing the national administration. But this, is farmers are emigrating in large numbers from only the natural operation of fixed laws. When this part of New York, to Wisconsin, Illinois our administration becomes so degraded that none but its hired presses can defend it; or so corrupt as to alarm the community generally, we may naturally expect that men of different views will unite to save the country from destruction-just as men-will unite against a common enemy. -Boston Atlas.

> HOW ROM RIVER WAS NAMED .- The original Indian name of the stream was Maniton (Spirit.) The French changed it to Riviere du Saint Esprit. (River of the Holy Spirit.) English or American traders next translated this into Spirit River, and afterwards for short, rum being the only "spirit" then known in those parts, called it Rum River.—Mil. Bent.

Bombs Plenty, Cash wanting. We learn by a dispatch from Washington, which we publish among our telegraphic news this morning that the administration have refused to pay concerning the prosecution of the war with small sum of money for which their late embas Russia. They were in reply to some statements | sador to Central America made himself and the government responsible at San Juan. Our readers will remember that after that eminent diplomatist had accomplished his successive labors of abetting if not instigating the killing of Antonio, repelling the officers who came to arrest the actual homicide, assuring the citizens of San Juan that they were the "offscouring of hell," receiving a bottle on the side of his nose, which glanced of without injury, sending Fabens for volunteers to burn the town, and finally rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, power to do anything with the powerful fleet this guard was left there on pay, and though which he had—and he need not tell the House Borland had pledged his embassadorial respon-Borland had pledged his embassadorial respon sibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these circumstances there was nothing to do but borrow, and accordingly Mr. Fabens, the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the home of the brave. Mr. Wood, probably because he was a democrat and a great admirer of General Pierce, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's draft on the government at Washington. It now seems, that this deaft fell due on last Monday, and was protested .-Messrs. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. They can attack and destroy defenceless towns in compliance with the desires of Mr. Borland and Mr. Fabens, but they can't return a thousand dollars which those functionaries have borrowed for the public service from a too confidng third party. This seems to be an appropriite finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons nomeless by their great exploit, there is a splendid propriety in cheating a simple merchant out of a thousand dollars. What a glorious administration is that we are blessed with!-N. Y. Tribunc.

> CITY MILLS .- We are informed that the mills, in the second ward, are all still idle, not being able, as yet, to get any grain to grind. Last year, earlier than this, the mills were in operation, and our market was plentifully supplied with new flour. The great difficulty of obtaining help has caused the harvest to continue some two or three weeks later than it otherwise would have done, and, consequently, new wheat does not make its appearance in our market as carly as usual .- Free Democrut.

SIX AT ONCE.—A German woman in a one orse wagon, passed through this city on Tues day, going from her residence a few miles west of town on a visit to her husband, who had been taken sick at the place, where he was, working in the country east of town. She had with her in the wagon, snugly propped up in a wine-baskst, six childaen, all the product of one birth. They were not much bigger than an apple dumpling, but seemed to be wide awake and kicking. They were six months old, all boys and all as near of a size as possible, except the runt of the party, which is described as being the mallest mortal of its age ever seen.

We state this case with serious misgivings of ts truth, relating it as it came to us at second hand from an eye-witness-a lady of character in this city, who saw and counted the children, and had the mother's word that they were al hers at a single birth.—Dayton Gazette.

THE BRITISH FLEET IN THE BALTIC .-- Admiral Berkeley recently made the following interesting statements in the House of Commons, concerning the prosecution of the war with Russia. They were in reply to some statements of Lord Dudley Stuart:

Admiral Berkeley said he could assure the noble lord that the government were as auxious to send out gunboats as he could be, but the matter was not so easy a one as the noble lord seemed to think. The noble lord had been pleased to say that if 20 of these vessels were sent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from the gallant officer who conducted operations in the Bultic; and as he had served with that officer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear.] Sir Charles Napier said that it was not in his power to do anything with the powerful fleet that when the gallant admiral penned these words he was chafing like a lion in his den, but that to attack Cronstadt or Svenborg would be vertain destruction. [Hear.] And what said Admiral Chads the most scientific officer in all that related to naval gunnerry of the present day. He said that after two days' inspection of the forts and the ships, he found that the fortifications were fur too substantial to make any impression upon, and that it would be useless to direct the fire of the ships against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at them. [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet, and whose business it was to see that no vessel Admiral Seymour said that he had never been at any time in want of anything—thanks to the provident measures adopted by the admiralty. [Cheers.] But the worst statement of all was that with which the noble load, the member for Marylebone, wound up his remarks, to the effeet that the fleeets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite means by the government, and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared-it being his duty to draw up the orders to the admirals-there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt.

northern servility to the south upon supposed reasons of self-interest, are myriad-headed.— From the time when a New York mercantile house was able to excite animadversion by the affirmation that "they sold their goods and not their 'principles,'" such was the circle of baseness that surrounded their independence to the last hotel-puff of arrivals from the south-not going beyond this period—we can find examples, prominent and comprehensive, of northern servility enough to make a sensitive soul ashamed that it ever knew being. Papers are not sufficient, no matter how well authenticated, but a passport is required from some well-known resident of Jeffersonville, before any black can travel by the road! By means of this rule, submitted to in a free state with a degree of servility not exceeded by a slave outright, we are informed that freemen of color have been seized, taken to Kentucky, imprisoned and whipped, until their freedom could be proved. In the practice of this rule, the milroad in question stands alone. It has no peer in the other roads, except so far as the whole state is responsible. If Indiana wishes to have a reputation as a civilized state she will bring the slave-driving directors of that road to their senses, and insist upon the right of every man to travel by it unquestioned, until legally apprehended for crime or misdemeanor. affairs she adds one more impediment to the enfranchisement of the free states, all of which are sunk to the level of lacqueys and overseers by the influeous fugitive slave bill .- N. BOMBS PLENTY, CASH WANTING .-- We learn by a dispatch from Washington, which we publish among our telegraphic news this morning, that the administration have refused to pay a small sum of money for which their late embas sador to Central America made himself and the government responsible at San Juan. Our readers will remember that after that eminent diplomatist had accomplished his successive labors of abetting if not instigating the killing of Antonio, repelling the officers who came to arrest the actual homicide, assuring the citizens of San Juan that they were the "offscoming of hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fabens for volunteets to burn the town, and finally rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, this guard was left there on pay, and though this guard was left there on pay, and though Borland had pledged his embassadorial responsibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks whose about the property of the propert which he had—and he need not tell the House Borland had pledged his embassadorial responeven supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these cheumstances there was nothing to do but borrow, and accordingly Mr. Fabens the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the home of the brave. Mr. Wood, probably because he was a democrat and a great admirer of General Pierce, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's deaft on the government at Washington. It now seems that this draft fell due on last Monday, and was protested .-Messis. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. They can attack and destroy defenceless towns in compliance with the desires of Mr. Borland and Mr. Fabens, but they can't return a thousand dollars which those functionaries have borrowed for the public service from a too confiding third party. This seems to be an appropriate finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons homeless by their great exploit, there is a splendid propriety in cheating a simple merchant out of a thousand dollars. But subsequently he repented, and on Fiiday morning the alarming fact appeared that by the secession of Weller from the cause of the executive, the committee was paralyzed, and its chairman deprived of the power to take any action on the subject. > The telegraph report from Washington to the effect that the government has refused to pay for the services of Mr. Borland's special police force organized at Greytown, cannot be true, as in one of the appropriation bills passed we find the following item:

> To enable the secretary of state to pay to the persons employed to protect the property and persons of citizens of the United States at San Juan de Nicaraugua, \$12,000, or so much thereof as may be necessary to defray the expenses

The Nebraska orators in Indiana have "a hard road to travel." The Lafayette Journal says: Holman, the democratic candidate for congress, in the fourth district, recently made a speech at Milan, Ripley county, to three or four hundred people. After he had finished, a vote of thanks was taken on the Nebraska bill and only one solitary individual voted in his favor. Poor Holman, we imagine, must have felt distressingly lonesome in that crowd.

NIP AND TUCK.-The Niagara Falls Iris says that a slave escaping from servitude, arrived in that village on Tuesday evening, and reached the ferry just in time to get into the little boat as it was preparing to leave for the Canada side. His master was on the same train in pursuit, and reached the ferry only in time to see his chattel midway across the foaming waters of the Niagara. The slave was last seen by the master at Cleveland; yet.although both were on the same train, the fugitive succeeded in cluding his vigilance, and placing himself beyond pursuit.

Six AT ONCE .- A German woman in a one horse wagon, passed through this city on Tuesday, going from her residence a few miles west of town on a visit to her husband, who had licen taken sick at the place where he was working in the son in the paneply in which her husband, and in the country east of town. THE RIGHT MATERIAL .- The emigrants who have been sent out by the Kansas emigration society appear to be men of the true stampfearless and bold. The Rochester Union tells a good story of these emigrants. The reward offered for the head of Eli Thayer, seems to have stimulated them to even a more defiant attitude:

Kansas Pioneer Party.—Letters have been received from Kansas pioneer party. They all arrived safe at the mouth of the Kansas river, on the 29th of July, only ten days from Rochester. They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missouri Argus publishes an account of a meeting; offer ing a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

Lucian Barbour is the anti-Nebraska candidate for congress, in the Indianapolis district, of Indiana. Mr. Barbour has always been an old-line democrat until the democracy en grafted the Nebraska swindle into their creed, and kicked out of their party every body who would not swear by this iniquity. He was nominated by a people's convention, and will receive the hearty support of all the opponents of slavery in his district.

Accident -A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurora, and had been in the western country but a short time, having emigrated from N. II -Inurnal.

Mr. Edward C. Delavan states that during the tholera season of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that our of those 100 men not one died of cholera, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a British seaman, now serving under Napier describ ing a skirmish:
"Every man on board volunteered, so the

taptain picked a crew, and I was sent ashore

with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear while the boat's crew made prizes with the gnns. The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed an advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He fell like a stone. At the same time a broadside from the - went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must go up to see him whether he was dead or alive. He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man, He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and did not look like an enemy. voice was gone. I could not tell a word he said, and every time he tried to speak the blood pourout so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from to order us aboard, and that aroused him. He pointed to the heach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to the wood where the enemy was concealed—poor fellow, he little thought that I had shot him down. I was wondering how I could leave. him to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehowthought of everything I had heard about the Turks and the Russians and the rest of them : but all that seemed so far off and the dead man

This establishment is now, as usual, the favorite place of resort for the Fashionable, the Cutting Department still being under my own personal supervision, and warranted to suit the most difficult, twenty per cent lower than any other establishment in the State.

No Fit. No Sale, is my doctrine. You will ask how I can do this; I will tell you: From my long experience in this business, and being a practical Tailor, I know when, where and how to buy my Goods, what to pay for them, and how to cut them, not

having to secure the services of an eminent artist, at a salary of \$1,000 to \$1,500 a year, which the purchaser must pay for—this is the secret. I have got on hand a good assortment of Ready Made Clothing,

\$15,000 Worth of BOOTS AND SHOES JUST RECEIVED AT THE

NEW GOODS:

Wisconsin Boot & Shoe Store. AM now receiving one of the lara gest and finest stocks of Boots and Shoes that I have ever before brought to Janesville, and what is finer than all the rest, I can sell them at lower prices than I have ever sold before, notwithstanding the great advance in the Eastern Market. My assortment of

Ladies Fine Shoes, Ladies Fine Shoes, in particular, I have no hesitation in saying amonot be caused in the State, both for style and durability, being all made to order, and in such a manner that I can warrant every article I sell, with the understanding at all dimes, that if they do not come up to the warrant, they shall be mended free of charge.

GENTLEMEN'S WEAR.

In this line I know beyond a doubt that I can show you a finer assortment and at better prices by twenty-five per cent, than can be found at any of the side shops or Day Goods stores about town: I wantifullistinctly understood that I make the BOOT AND SHOE TRADE my WHOLE STUDY, and that I Buy More, Sill More and know more about the trade, than the schole pile of petty dealers put together. And I know also that I can make it an object for Every Farmer in Hock Corniy, as well as every one that trades in Janesville to buy their Boots and Shoes of me for the more I sell the smaller profits I can sell at.

Manufacturing.

I want to say a few words to you in regard to my Manufacturing Department, to wit: That I am now engaged more extensively in the manufacturing business, and probably am selling more custom work than all the shops about town put together, simply for these reasons—that I use better Stock, being entirely of Eastern tannage, which every one knows is worth twenty-five per cent more than the common western tannad leather; and what is a better reason and of greater importance, I can Sell my Custom Work at Much Lower Prices,

Sell my Custom Work at Much Lower Prices, and at the same time sell you a better article than you can get at the shops, for this reason, which you must all see is a very palpable one, that in buying my stock enstand in such large quantities, T. of course sawe of very large per cent, and thereby can sell at lower prices and at the same time make my profits.

I want to state further that I have secured the services of Ma. Buckingdam, who has formerly been engaged in the manufacturing business on the west side of the. River, and who is known by every one to be the best manufacturer in the city; and if we don't get you up a better article, both in regard to style and durability, we will forfeit our money and our reputation, and I pledge you my word that this is no small forfeit.

Leather and Findings. I have just received over \$3,000 worth of the very best brands of Eastern Sole & Upper Leathers also, a very large assortment of Fith MCF and PHILADELIPHIA NIP and PRENCH CALF ESINS, together with a full assortment of MOROCCOS of every

KHER'S ROCK OLL, TROM a Well 400 feet deep, Near Pittsburgh,
Pa., is offered to the public as a Natural Medicine
of no common value. It is a different thing from the old
Mentucky or American Oil, as this is used iNTERINALLY
as well as externally. As a local remedy in Paralysis,
Piles, Rheumatism, Denfiness, Loss of Sight, Burns, &c.
—also, as a valuable Internal Remedy for Piles, Aguc,
Scrofula, Coughs, Diarrhea, Erysipelas, old Sores, Eruptions of the Skin, Female Diseases, Worms, Bladder and
Kidneys, Bronchitis, Pains &c. &c., it invites the investigating Physician, as well as the suffering patient, to
become acquainted with its morits.

Discovered in 1849, it has within 2 or 3 years, made
multitudes of cures, and multitudes of friends—and as
seon as tried the Sales not only there are but hold out.
Testimony to its great merit is constantly accumulating
the fands of the proprietor by certificates, letters,
and in other ways.

Testimony to its great merit is constantly accumulating the fands of the proprietor by certificates, letters, and in other ways.

IT DOCTORS THE WHOLE MAN—desh and blood —skin and bones—from head to toot—how it acts upon the system—upon disenses of different manifestations, we cannot fully tell. While it is both cathartic and astringent, it is Alterative—and mind you, a REGULATOR: A leading principle in it is Naptha. When you once have it in the family zen will not be without it.

Full as the world is of Patent Bredicines—it is thought not best to suppress this, the work of NATURE—to make room for Finnan theoritions. Price 50 cents per houte. It can be had of wholesalers at the large cities and towns in the West at Proprietor's prices.

HAVE WE AGUS AMONG US?—A tea spoonful every three hours in the absence of the fever will cure you of Ague or Diarrhoa. CFF Physiciaus, Druggists, and all friends of the afflicted, will do well to recommend this GH for PROLAPSUS UFRI, and good will be done—take the usual dose 2 or 3 times a day, and bathe the lower part of the back with it. Have you SCROFULA? The Petroleum will cradicate it, root and branch, at little cost or Inconvenience. Get cheinars of directions for adults and children, graits of the agents. A trial is all we ask. Mind and get the right kind—it is of to beautiful reddish color and clear. Try is for Piles.

THE WORLD IS CHALLENGED
to produce so many well authenticated certificates of care, not only from intelligent patients, but from wident time Physicians. The sale now in New York is perfectly ASTONISHING, and thousands who visit the Crystal Palace where they are on exhibition, seldom fail to obtain a chain before they leave the city.

making a Drug Shop of their stomach—swallowing bottle after Bottle of siekening, disgusting trush, having no more effect in even relieving, much less curing, the disease for which they are recommended, than a Poor Man's Plaster applied to the top of the head would have in curing an infant of worms.

All these great and remarkable discoveries, by which every ill "which flesh is heir to" is cradicated from the earth—strange as it may seem—are made by men who are too ignorant to obtain a living by any other mode, and their knowledge of disease, its proper mode of cure, its cause, is just as extensive as an Arab's is of the mechanism of a steam engine. No intelligent person will deny the truth of this, and no Physician dare risk, his reputation as an honest man, and declare that nervocas diseases are not more frequently increased in severity, than rebieved, by the old-antiquated way of giving medicine into the stomach. Capital and accumulation, \$650,000. THIS Company is one of the oldest, A and among the most prudently and successfully conducted in the country. The primary object in conducted in the country. The primary object in conducting its business has been to provide perfect security under all conceivable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is observed.

Every insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium. The directors are required to be pecuniarily interested in the company, and they give it their personal at-tention; and bonds of sufficient security are given by its officers for the faithful performance of their daties. Insurance may be effected for the benefit of the wife, which is secured to her by law beyond the reach of. husband's creditors; and creditors may insure the lives of debtors. Capital and accumulation, \$650,000. THIS Company is one of the oldest, A and among the most prudently and successfully conducted in the country. The primary object in conducted in the country. The primary object in conducting its business has been to provide perfect security under all conceivable circumstances, for the payment of its losses under its policies, and to return to the insured the surplus at stated periods, and strict economy is observed.

Every insured person is a member of the company and shares in the profits of the business, and is subject to no liability or assessments beyond his premium. The directors are required to be pecuniarily interested in the company, and they give it their personal at-tention; and bonds of sufficient security are given by its officers for the faithful performance of their daties. Insurance may be effected for the benefit of the wife, which is secured to her by law beyond the reach of. husband's creditors; and creditors may insure the lives of debtors. received from Kansas pioneer party. They all arrived safe at the mouth of the Kansas river. on the 20th of July, only ten days from Rochester. They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missonii Argus publishes an account of a meeting, offering a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

Lucian Barbour is the anti-Nebraska vandidate for congress, in the Indianapolis district, of Indiana. Mr. Barbour has always been an old-line democrat until the democracy engrafted the Nebraska swindle into their creed, and kicked out of their party every body who would not swear by this iniquity. He was nominated by a people's convention, and will receive the hearty support of all the opponents of slavery in his district.

Accident.—A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurora, and had been in the western country but a short time, having emigrated from N. II.

Mr. Edward C. Delavan states that during the cholera season of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that out of those 100 men not one died of cholera, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a British seaman, now serving under Napier describing a skirmish: "Every man on board volunteered, so the

captain picked a crew, and I was sent ashore with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the —, what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear while the boat's crew made prizes with the guns, The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed an advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He felt like a stone. At the same time a broadside from the — went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must be clear. same time a broadside from the ---- went in could scarce tell how. I felt as though I must clean. go up to see him whether he was dead or alive. He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and and not look like an enemy. What I felt I never can tell, but if my life would have saved his I believe I should have given it.

I laid his head on my knee, and he grasped hold of my hand and tried to speak, but his voice was gone. I could not tell a word he said. and every time he tried to speak the blood pourout so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from the --- to order us aboard, and that aroused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to the wood where the enemy was concealedpoor fellow, he little thought that I had shot him down. I was wondering how I could leave him to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehow thought of everything I had heard about the Turks and the Russians and the rest of them; but all that seemed so far off and the dead man

They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missonii Argus publishes an account of a meeting, offering a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

Lucian Barbour is the anti-Nebraska vandidate for congress, in the Indianapolis district, of Indiana. Mr. Barbour has always been an old-line democrat until the democracy engrafted the Nebraska swindle into their creed, and kicked out of their party every body who would not swear by this iniquity. He was nominated by a people's convention, and will receive the hearty support of all the opponents of slavery in his district.

Accident.—A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurora, and had been in the western country but a short time, having emigrated from N. II.

Mr. Edward C. Delavan states that during the cholera season of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that out of those 100 men not one died of cholera, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a British seaman, now serving under Napier describing a skirmish:

"Every man on board volunteered, so the captain picked a crew, and I was sent ashore with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the —, what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear while the boat's crew made prizes with the guns, The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed an advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He fell like a stone. At the same time a broadside from the — went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must be clear. same time a broadside from the ---- went in could scarce tell how. I felt as though I must clean. go up to see him whether he was dead or alive. He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and and not look like an enemy. What I felt I never can tell, but if my life would

I laid his head on my knee, and he grasped hold of my hand and tried to speak, but his voice was gone. I could not tell a word he said. and every time he tried to speak the blood pourout so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from the --- to order us aboard, and that aroused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to the wood where the enemy was concealedpoor fellow, he little thought that I had shot him down. I was wondering how I could leave him to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehow thought of everything I had heard about the Turks and the Russians and the rest of them; but all that seemed so far off and the dead man

have saved his I believe I should have given it.

\$15,000 Worth of ... eddhe dikla enoes JUST RECEIVED AT THE

Wisconsin Boot & Shoe Store, T AM now receiving one of the largest and finest stocks of Boots and Shoes that I have ever before brought to Janesville, and what is finer than all the rest, I can sell them at lower prices than I have ever sold before, notwithstandis

vance in the Pastern Market. My ussortment of Ladies Fine Shoes. . . in particular, I have no healtation in saying cannot be equaled in the State, both for style and durability, being all made to order, and in such a manner that I can warrant every article I sell, with the understanding at all times, that if they do not come up to the warrant, they shall be mended free of charge.

GENTLEMEN'S WEAR. In this line I know beyond a doubt that I can show you a fluor assortment and at better prices by twentyfive per cent, than can be found at any of the side shops or Dry Goods stores about town. I want it disuncily understood that I make the BOOT AND SHOEL TRADE my WHOLE STUDY, and that I Buy More, Sell More and know more about the trade, than the whole pile of petty dealers put together. And I know also that I can make it an object for Every Farmer,

in Breck County, as well as every one that-trades in Janesville to buy their Boots and Shoes of me for the more I sell the smaller profits I can sell at.

Manufacturing. I want to say a few words to you in regard to my . Manufacturing Department, to wit: That I am now engaged more extensively in the manufacturing business, ind probably am selling more custom work than all the shops about town put together, simply for these reasons—that I use better Block, being entirely of Eastern tannage, which every one knows is worth twenty-five per cent more than the common western tanned leather; and what is a better reason and of greater impor-

tance, I can Sell my Castom Work at Much Lower Prices, and at the same time kell you a better article than you can get at the shops, for this reason, which you must all see is a very palpable one, that in buying my stock east and in such large quantities, I of course save a very large per cent, and thereby can sell at lower prices

and at the same time make my profits.

I want to state further that I have secured the services of Mn. Buckingham, who has formerly been engaged n the manufacturing business on the west side of the lliver, and who is known by every one to be the best manufacturer in the city; and if we don't get you up a better article, both in regard to style and durability, we will forfeit our money and our reputation, and I pledge you my word that this is no small forfeit.

Leather and Findings. I have just received over \$3,000 worth of the very best brands of Eastern Sole & Upper Leath-

Precisely Milwankee and Chicago Prices. I have constantly on hand, also, a large assortment of all kings of FINDINGS, LASTS, DOOT THEES, CHIMPS, etc., etc., all of which will be sold at the same rates. I request the attention of manufacturers in town as well as in the country to my stock, as I, think I can make it an object for you to buy of me. At least, I can sell you a much superior article to that which you get

TO THE LADIES, I would say that I am under very great obligation for he partiality you have shown me, in always procuring your understanding from me, and I now publicly promise and swear that Lwill make every one of you who may be entitled to the same a present of a handsome pair of CACKS, when I shall have closed up my sheesciling career. I would say further, that I am prepared
to get up to order any style of work you wish, at low
rates. I have a Yours respectfully.

JANESVILLE : : : : WISCONSIN, THURSDAY MORNING, AUG. 17, 1854.

We have received a note from Mr. Noggle in relation to the publication of his oration at Fulton now in progress in our columns, which is of a character for which there is thus far no provocation. If Mr. Noggle has any explanations or denials to make in the matter, or wishes to criticise the literary productions of Mr. Armstrong, he shall have all the chance he wishes; but we shall not open our columns to a mere personal, vituperative controversy. This was the condition imposed upon Mr. Armstrong in the outset, and we shall not abate it in favor of

A THOROCOR POLITICIAN.-The Appleton Crescent says of Dr. Stoddard Judd, of Dodge co., "this gentleman-a democrat in '37, a conservative in '38, a whig in '40, a Tylerite in '42, a Clay whig in '44, a Polk democrat in '441, a whig in '45, a tad democrat in '46, a hunker democrat in '47, a free soiler in '48, a Doty man in '50, a compromise democrat in '52, and an anti-Nebraska democrat in '54-is said to be a candidate for the democratic nomination for congress." The most comprehensive and appropriate name ever applied to the worthy doctor was given him by Mr. Brace, of Prairie du Chlen, when both were members of the constitutional convention. The title then applied was a "ro tary democrat," and no subsequent name could be an improvement upon it.

The Milwaukee News, after a suspension of a week or two,appears in a new dress and under new management. The new publishers and editors are Messrs. G. W. Clason and C. F. Huntsman, who retain Mr. Shaw, the late editor, as an associate. The introductory address indicates a radical and commendable change in its former character, if the following promises are kept: We shall advocate every enterprise, public

and private, having a tendency to promote the interest of our thriving and populous city; and in doing this, we shall also seek the prosperity of the state at large; for whatever tends to promote the one, will equally enhance the intorest, the happiness and wealth of the other. To our editorial brethren, we cordially extend

the right hand of fellowship. In our intercourse it shall be our faithful endeavor to cultivate feelings of kindness by discussing fairly every question that comes before us, without descending to low personalities.

UNLOADING A LOCOMOTIVE.—The Wisconsingives the operation of taking a locomotive from the deck of a vessel to the ground. A temporary inclined plane of timber is raised from the rails on the dock to the side of the vessel, an application is made of "the screws" under the engine, by which it is raised to the proper height, rails are laid under the wheels, and it is run off as easily as you please.

The Watertown Register says that Messrs. Bishop and Stewart have thrown up their contract on the Watertown and Milwaukee rail-

The Wisconsin of Tuesday afternoon says that neither the Madison Journal or Argus are right in their statements as to the extent of the sinking of the railroad track near that village, as the whole state is responsible. If Indiana and adds that "the track has fallen about eight feet, and lies six feet under water, for a space of about 140 rods, the superstructure having sunk and forced up the earth on each side .--The detention of crossing, and the cost of filling up are the only inconvenience and expense."

A GRANT OF LAND FOR THE INPROVEMENT .-fond an Lac Heraid has the following We have just been shown a letter from I. P. Walker to the improvement company, stating that a bill making an additional grant of about 100,000 acres of land in aid of the Fox and Wisconsin river improvement, has passed both branches of congress and become a law. This grant is designed to cover the deficiency in the original grant, caused by different Indian reservations and private land claims.

This is the third bill of the kind which Mr. Walker has succeeded in piloting through the senate; all previous ones, however, were lost in the house. This one, it seems, through the energy and perseverance of Mr. Eastman, of the house, has succeeded. This places the company in a situation to push the improvement along to completion as fast as men and means can do it.

A BARREN MARKET.-Eggs are so scarce and in such good demand, that 14 cents per dozen is paid for them out of the wagons. Not a pound of fresh butter can be got for less than 16 cents per lb. Spring chickings are highly desirable and marketable article. Nearly as much is paid for a nice fat lamb as for an old sheep—hardly has one been seen in the market this summer. Madison Argus.

THE DROUTH IN NEW YORK AND THE SOUTH west.—One of the N. Y. Tribune's reporters having recently visited Northern New York, states that in St. Lawrence and Jefferson counties, the drouth is worse there than in the two years past, when they have been burned up.-Hay \$10 to \$12 a ton in the field and scarce at that. Cows were selling for \$8, owners seeing no probability of providing food for them. The farmers are emigrating in large numbers from this part of New York, to Wisconsin, Illinois and Iowa.

If the farmers of Wisconsin would realize how signally they have been favored by Providence during the current season, they have only to read the accounts of the great drouth in the adjoining states of Illinois and Indiana. It is represented to be beyond all precedent. Almost the entire corn and potatoe crop, the Central Illinois papers say, is already ruined. In the opinion of the Tribune, the worst of it is that the more the country is settled, the oftener these killing drouths will occur. - Wis.

THE OHIO AND PENNSTLVANIA HORSE SHOW. The people of Columbia county, Ohio, have raised \$1,200 for premiums to be given at a great horse exhibition to be held at Salem, Oct. 12, 14. It is got up on the plan of the "world's horse convention," but only for that portion of the world living in Ohio and Pennsylvania. It is also intended as a great sale fair as well as show for prizes.

THE BRITISH FLEET IN THE BALTIC .- Admiral Berkeley recently made the following interesting statements in the House of Commons, concerning the prosecution of the war with Russia. They were in reply to some statements of Lord Dudley Stuart:

Admiral Berkeley said he could assure the noble lord that the government were as anxious to send out gunboats as he could be, but the matter was not so easy a one as the noble lord seemed to think. The noble lord land been pleased to say that if 20 of these vessels were sent out to the Baltic, Cronstadt would be successfully bombarded. Now he had a letter from the gallant officer who conducted operations in the Baltic; and as he had served with that offlcer, he could state positively that no possible attempt would be omitted which held out the promise of getting at the enemy. [Hear, hear.] Sir Charles Napier said that it was not in his power to do anything with the powerful fleet which he had—and he need not tell the House that when the gallant admiral penned these vords he was chafing like a lion in his den, but that to attack Cronstadt or Sveaborg would be certain destruction. [Hear.] And what said Admiral Clads the most scientific officer in all that related to naval gunnerry of the present day. He said that after two days' inspection of the forts and the ships, he found that the fortifications were far too substantial to make any impression upon, and that it would be useless to direct the fire of the ships against such masses of granite, and that, as to the ships, they were so placed that it was impossible to get at them. [Hear, hear.] He would trouble the house with one more short extract from a letter of Admiral Seymour, the captain of the fleet. and whose business it was to see that no vessel was without everything which was required .-Admiral Seymour said that he had never been at any time in want of anything-thanks to the provident measures adopted by the admiralty. Cheers.] But the worst statement of all was that with which the noble lord, the member for Marylebone, wound up his remarks, to the efthat the ficeets and arsenals of Russia might have been taken before this time had the gallant admiral been supplied with the requisite means by the government, and had they not received orders to hold their hands. Now in the strongest language in which he could utter his sentiment, he declared—it being his duty to draw up the orders to the admirals-there never had been officers who had received more carte blanche to undertake what they pleased; and that, so far from their hands being tied up, the government had encouraged them in every operation which they thought fit to attempt.

SLAVERY IN INDIANA .- The phenomena of northern servility to the south upon supposed reasons of self-interest, are myriad-headed. From the time when a New York mercantile house was able to excite animadversion by the affirmation that "they sold their goods and not their 'principles,'" such was the circle of baseness that surrounded their independence to the last hotel-pull of arrivals from the south-not going beyond this period-we can find examples, prominent and comprehensive, of northern servility enough to make a sensitive soul ashamed that it ever knew being. A fresh evidence of It seems that the stock of the Jeffersonville and Indianapolis railroad is chiefly held in Louisville, Ky., though the road is in Indiana, a free state so-called. The direction being thus controlled in a slave state, has established a rule that every colored person traveling thereby, shall prove ter how well authenticated, but a passport is required from some well-known resident of Jeffer sonville, before any black can travel by the road! By means of this rule, submitted to in a free state with a degree of servility not exceeded by a slave outright, we are informed that freemen of color have been seized, taken to Kentucky, imprisoned and whipped, until their freedom could be proved. In the practice of this rule, the milroad in question stands alone. It has no peer in the other roads, except so far wishes to have a reputation as a civilized state road to their senses, and insist upon the right of legally apprehended for crime or misdemeanor. so far as she admits such slave direction in her affairs she adds one more impediment to the ensunk to the level of lacqueys and overseers by the infamous fugitive slave bill.—N. Y. Tri-

METEOROLOGICAL.-Mr. E. Merriam, a gentleman who is widely known as the "New York meteorologist," in a communication to the Journal of Commerce, makes mention of the following facts, which will perhaps prove new to some of our readers:

bune,

A thunder storm pursues its own path independent of the wind, and travels the same path often, and again and again, as the records of the death of persons killed by lightning, and objects

struck by lightning, bear witness.
For many years, we have, by the aid of assoclate observers, made thermometrical, meteorological and kindred observations, upon the continent and upon the ocean, at every point of the compass, and have the accurate means of measuring the velocity with which heat and cold travel over the surface.

In December, 1851, the cold came north from Tennessee, independent of wind, and in April, 1854, the heat came from the northwest, independent of wind. Our observations made in Tennessee, and Canada, and at points intermediate, determine this.

What falls from a cloud, whether hall or snow, or rain, in the quantity and temperature, affect, to a greater or less extent, the temperature of the air through which the descent is made. If a current of wind was turned downward,

roin a point twenty thousand feet above our heads, it would bring with it a winter's atmosphere in summer.

The Post seems astonished that men differing materially from each other should unite in opposing the national administration. But this is only the natural operation of fixed laws. ... When our administration becomes so degraded that day, going from her residence a few miles west none but its hired presses can defend it; or so corrunt as to alarm, the community generally, we may naturally expect that men of different views will unite to save the country from de- in the wagon, snugly propped up in a wine-basstruction-just as men will unite against a common enemy .- Boston Atlas.

HOW RUM RIVER WAS NAMED .- The original Indian name of the stream was Manitou (Spirit.) The French changed it to Riviere du Saint Esprit. (River of the Holy Spirit.) English or American traders next translated this Into Spirit River, and afterwards for short, rum being the only "spirit" then known in those parts, called it Rum River .- Mil, Sent.

Sir Isaac Newton is said to have worn a magnet in a ring which was capable of lifting two hundred and fifty times its weight. We have seen a lover who, when he got his magnet in a ring-a wedding ring-was lifted to the seventh heaven!

BOMBS PLENTY, CASH WANTING .- We learn by a dispatch from Washington, which we pubish among our telegraphic news this morning, that the administration have refused to pay a small sum of money for which their late embassador to Central America made himself and the government responsible at San Juan. Our readers will remember that after that eminent diplomatist had accomplished his successive labors of abetting if not instigating the killing of Antonio, repelling the officers who came to arrest the actual homicide, assuring the citizens of San Juan that they were the "offscoming of hell," receiving a bottle on the side of his nose, which glanced off without injury, sending Fabens for volunteers to burn the town, and finally rowing across in peace to Point Arenas, he enlisted a special guard to defend the premises of the Transit company at \$100 a month wages, and \$50 bounty per man, after which he came to Washington and got the government to send and destroy the town. Meanwhile, however, this guard was left there on pay, and though sibility that they should have their money, the pledge would not meet their board bills, nor even supply them with the drinks, whose absorption at the bars of San Juan relieved and varied the stern severity of their military duties. Under these cheamstances there was nothing to do but borrow, and accordingly Mr. Fabens, the commercial agent, applied to Mr. S. S. Wood an American citizen residing there as a merchant, for a loan on account of the land of the free and the home of the brave Mr. Wood, probably because he was a democrat and a great admirer of General Pierce, agreed, and handed over \$1000 in gold, in exchange for which he received Mr. Faben's draft on the government at Washington. It now seems that this draft fell due on last Monday, and was protested.-Messis. Pierce and Marcy are ready to fight, but when it comes to paying, they repudiate. in compliance with the desires of Mr. Borland and Mr. Fahens, but they can't return a thousand dollars which those functionaries have borrowed for the public service from a too confiding third party. This seems to be an appropriate finale to the whole business. After having shocked and disgusted the civilized world, and rendered some hundreds of innocent persons homeless by their great exploit, there is a splendid propriety in cheating a simple merchant out of a thousand dollars. What a glorious administration is that we are blessed with !- N. Y.

THE HABEAS CORPUS CASE.-We give to-day Chief Justice Whiton's opinion on the second application of S. M. Booth to be discharged from the custody of the U. S. marshal. We think the correctness of the decision and the distinction between this and the former case are so clear that "the way faring man" cannot fail to see them. And we think, moreover-(whatever criticisms may be passed upon these decisions, by men with or without legal attainments, on the one hand and the other,) that Wisconsin has a reason to be proud of her supreme beach, for its impartiality, its firmness and eminent ability and learning.—[Wisconsin Patriot, (dem.)

CITY MILLS .- We are informed that the mills, in the second ward, are all still idle, not being year, earlier than this, the mills were in operation, and our market was plentifully supplied with new flour. The great difficulty of obtaining help has caused the harvest to continue some two or three weeks later than it otherwise would have done, and, consequently, new wheat does not make its appearance in our market as early as usual,-Free Democrat.

The failure of the ten million Cuban scheme, in the senate, is now attributed to the unaccountable defection of John B. Weller, senator from California, who is a member of the committee of foreign affairs, and sustained the ten million grant in committee, when first demanded by the president, making the vote stand there at 4 to 2. But subsequently he repented, and on Friday morning the alarming fact appeared that by the secession of Weller from the cause of the executive, the committee was paralyzed. she will bring the slave-driving directors of that and its chairman deprived of the power to take any action on the subject. Weller acted with every man to travel by it unquestioned, until the illsaffected senators generally, during the session; but the administration appointed his brother postmaster at San Francisco, and his support was supposed to have been secured franchisement of the free states, all of which are | thereby. But the favor does not seem to have made a friend of him after all .- Buffalo Com.

> The telegragph report from Washington to the effect that the government has refused to pay for the services of Mr. Borland's special police force organized at Greytown, cannot be true, as in one of the appropriation bills passed we find the following item:

To enable the secretary of state to pay to the persons employed to protect the property and persons of citizens of the United States at San uan de Nicaraugua, \$12,000, or so much thereof as may be necessary to defray the expenses so incurred.

The Nebraska orators in Indiana have "a hard road to travel," The Lafayette Journal says: Holman, the democratic candidate for congress, in the fourth district, recently made a speech at Milan, Ripley county, to three or four undred people. After he had finished, a vote of thanks was taken on the Nebraska bill and only one solitary individual voted in his favor. Poor Holman, we imagine, must have felt distressingly lonesome in that crowd.

NIP AND TUCK .- The Ningara Falls Iris says that a slave escaping from servitude, arrived in that village on Tuesday evening, and reached the ferry just in time to get into the little boat as it was preparing to leave for the Canada side. His master was on the same train in pursuit, and reached the ferry only in time to see his chattel midway across the foaming waters of the Niaga-

ra. The slave was last seen by the master at Cleveland; yet although both were on the same train, the fugitive succeeded in cluding his vigilance, and placing bimself beyond pursuit.

Six at ONCE .- A German woman in a one horse wagon, passed through this city on Tuesof town on a visit to her husband, who had been taken sick at the place where he was working in the country east of town. She had with her kst, six childaen, all the product of one birth. They were not much bigger than an apple dumpling, but seemed to be wide awake and kicking. They were six months old, all boys, and all as near of a size as possible, except the runt of the party, which is described as being the sinaliest mortal of its age ever seen.

We state this case with serious misgivings of its truth, relating it as it came to us at second hand from an eye-witness-a lady of character in this city, who saw and counted the children, and had the mother's word that they were all hers at a single birth .- Dayton Gazette.

Charles Lamb hit the hydropathists when he said-"Water cure was as old as the deluge, only that the first great application happened to kill more than it cured," JANESVILLE, Aug. 17th, 1854.

DEAR SIR :- By a typographical error in yesterday's Gazette, a mistake was made in the date of the paper in which Mr. Chase's oration appeared. It was August 19th, 1853, instead of August 14th.

You will find the extracts continued in today's paper. Yours truly, JAMES ARMSTRONG.

THE RIGHT MATERIAL. - The emigrants who have been sent out by the Kansas emigration society appear to be men of the true stampfearless and bold. The Rochester Union tells a good story of these emigrants. The reward offered for the head of Eli Thayer, seems to have stimulated them to even a more defiant attitude :

Kansas Pioneer Party .- Letters have been received from Kansas pioneer party. They all arrived safe at the mouth of the Kansas river, on the 29th of July, only ten days from Rochester. They were to leave for a trip up the Kansas river in a few days. They intend to locate and build each a log cabin; the beginning of the to-be-city of the west. The Missouri Argus publishes an account of a meeting, offer ing a reward of \$200 for Eli Thayer, president of the Kansas emigration society. Some of the pioneer party stated to the slaveholders they met, if they would hand over the money, the man stood ready to personate Mr. Thayer and take the consequences.

Lucian Barbour is the anti-Nebraska candidate for congress, in the Indianapolis district, of Indiana. Mr. Barbour has always been an old-line democrat until the democracy engrafted the Nebraska swindle into their creed, and kicked out of their party every body who would not swear by this iniquity. He was nominated by a people's convention, and will receive the hearty support of all the opponents of slavery in his district.

ACCIDENT.—A young man by the name of John Hayes, riding on top of a car connected with the freight train of the Chicago and Aurora railroad, while passing under a bridge near the Junction, on Saturday evening, was knocked off and immediately killed. He resided at Aurora, and had been in the western country but a short time, having emigrated from N. H. —Journal,

Mr. Edward C. Delavan states that during the cholera senson of 1832 he had engaged at work for him over 100 men. He prevailed upon them to abstain from all intoxicating drinks, and gave to them a beverage of water, molasses, vinegar and ginger. The result was, that out of those 100 men not one died of cholern, while out of 30 laborers who worked directly opposite and who used strong drinks, ten died with the disease. Mr. Delevan considered abstinence from the use of liquor as a pretty sure preventive of the disease.

The extract below describes one of the thousand individual "victories" that go to make up a national one. It is from a letter from a British seaman, now serving under Napier describing a skirmish:
"Every man on board volunteered, so the

captain picked a crew, and I was sent ashore with the marines. There were regular troops on the bank who fired on us we as pulled to land, but the broadside of the ----, what with the shell and what with the smoke, covered our landing. We dispersed at a few hundred yards distant from the beach to keep the coast clear while the boat's crew made prizes with the guns. The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed an advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He fell like a stone. At the same time a broadside from the —— went in among the trees, and the enemy disappeared we could scarce tell how. I felt as though I must go up to see him whether he was dead or alive. He lay quite still, and I was more afraid of him lying so than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me-I shall never forget it. He was a fine young fellow, not more than five and twenty. I went down on my knees beside him, and my breast was so full as if my heart would burst. He had a real English face and did not look like an enemy, What I felt I never can tell, but if my life would have saved his I believe I should have given it. I lold his head on my knee, and he grasped hold of my hand and tried to speak, but his

voice was gone. I could not tell a word he said, and every time he tried to speak the blood pour-out so, that I knew it would soon be over. I am not ashamed to say that I was worse than he, for he never shed a tear and I could'nt help it. His eyes were closing when a gun was fired from - to order us aboard, and that aroused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our marines were waiting to man the second boat, and then he pointed to the wood where the enemy was concealed—poor fellow, he little thought that I had shot him down. I was wondering how I could leave blin to die and no one near him when he had something like a convulsion for a moment and then his face rolled over, and without a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time; I somehow thought of everything I had heard about the Turks and the Russians and the rest of them; but all that seemed so far off and the dead man

GENTLEMEN'S WEAR.

In this line I know beyond a doubt that I can show you a finer assortment and at better prices by twenty-five per cent, than can be found at any of the side shops or Bry Goods stores about town. I want it distinctly understood that I make the BOOT AND SHOIL TRADE any WHOLE STUDY, and that I hay More, Sell More and know more about the trade, than the whole pile of petty dealers put together. And I know also that I can make it an object for Every Furnier In Reck County, as well as every one that trades in Janesville to buy their Boots and Shoes of me for the more I sell the smaller profits I can sell at.

I want to say a few words to you in regard to my Manufacturing Department, to wit: That I manow engaged more extensively in the manufacturing business, and probably am selling more custom work than all the shops about town put together, shaply for these reasons—that I use better Stock, being entirely of Fastern tamage, which every one knows is worth twenty-five per cent more than the common western tamed leathers, and what is a better reason and of greater times.

Sell my Custom Work at Much Lower Prices,

I want to sinte further that I have secured the servi-ces of Mn. Buckingham, who has formerly been engaged in the manufacturing business on the west side of the River, and who is known by every one to be the best manufacturer in the city; and if we don't get you up a better article, both in regard to style and dura-bility, we will forfelt our money and our reputation, and I pledge you my word that this is no small forfelt.

PROM a Well 400 feet deep, Near Pittsburgh,
Pa., is offered to the public as a Natural Medicine
of no common value. It is a different thing from the old
Kentucky or American Oil, as this is used INTERNALLY
as well as externally. As a local remedy in Paralysis,
Piles, Rheumatism, Dealness, Loss of Sight, Burns, &c.
—also, as a valuable Fiscental Remedy for Piles, Ague,
Scrofula, Coughs, Diarrhwa, Erysipelas, old Sores, Eruptions of the Skin, Female Diseases, Worms, Bladder and
Kildneys, Bronchittis, Pains &c. &c., it invites the investigating Physician, as well as the suffering patient, to
become acquainted with its merits.
Discovered in 1849, it has within 2 or 3 years, made
multitudes of cures, and multitudes of friends—and as
soon as tried the Sales ast only Sucretas but hold out.
Testimony to its great nerit is constantly accumulating
in the hands of the proprietor by certificates, letters,
and in other ways.

and in other ways.

IT DOCTORS THE WHOLE MAN—flesh and blood—skin and bones—from head to foot—how it acts upon the system—upon diseases of different manifestations, we cannot fully tell. While it is both cathartic and astringent, it is Alternitye—and mind you, a REGULATOR. A leading principle in it is Maptha. When you once have it in the family you will not be without it.

Full as the world is of Patent Medicines—it is thought not best to suppress this, the work of NATURE—to make room for Luman inventions. Price Dicents per bottle. It can be had of wholesalers at the large cities and towns in the West at Proprietor's prices.

HAVE WE AGUE AMONG US!—A tea spoonful every three hours in the absence of the fever will cure you of Ague or Diarrhees. EM Physicians, Druggists, and all friends of the afflicted, will do well to recommend this Oil for PROLAPSUS UTERI, and good will be done—take the usual dose 9 or 3 times a day, and bathe the lower part of the back with it. Have you SCROFULA? The Petroleum will eradicate it, root and branch, at little cost or inconvenience. Get circulars of directions for adults and children, gratis of the agents. A trial is all we ask. Mind and get the right kind—it is of a beautiful reddish color and clear. Try it for Piles.

A GREAT MISTAKE, J. B. CROSBY & Co. HAVE just returned from New York and Boston, and purchased so large a stock of Merchan-dise that they have not room to store them, and to rem-edy this, they have concluded to mark their goods

A TRIFLE ABOVE COST which will crowd their store with customers and ensure arge and heavy sales, thus making room for goods yet to arrive. Ladies and Gentlemen

THIS IS NO HUMBUS, but a REALITY, and to be convinced of this fact per sonally, look through their immense stock, see the amount of goods they have in store, (and but a portion of their stock has yet arrived,) enquire th you will acknowledge that we will sell you GOOD GOODS, at nearly half the Price, that other Merchanis charge. We shall not mention a few leading articles and their prices, and sell the balance of stock at higher rates, as other Merchanis do, but shall mark our whole stock at a small regular profit, and adhere strictly to the

Our stock consists of STAPLE AND PANCY DRY GOODS, GROCERIES, CROCKERY, BOOTS AND SHOES, HATS, GAPS, CARPETS, OH. CLOTHS, READY-MADE CLOTHING, &c. &c., to which we invite especial attention, as to quality and price, as we are determined that

CAN AND WILL BELL, CHEAPER AND BETTER GOODS,

We would say, that we will sell you goods at New York and Boston prices, adding freight. You will find us at the old stand of J. B. CROSBY, two doors above the

ALL NERVOUS DISEASES

every ill "which flesh is heir to" is cradicated from the carth—strange as it may recon—are made by men who are too ignorant to obtain a living by any other mode, and their knowledge of disease, its proper made of cure, its cause, is just as extensive as an Arab's is of the mechanism of a steam engine. No intelligent person will deny the truth of this, and no Physician dare risk his reputation as an honest man, and declare that nercous diseases are not more frequently increased in severity than relieved, by the old antiquated way of giving medicine into the stomach. If people will only become sensible and think for themselves, and believe that physicians practice upon their creduity more than they

The Hydro-Electric chains are now for the first time offered to the people of Nashna, as being a better, quicker, and safer mode of curing all nervous disenses, than any other method or means hitherto-discovered. They can be used by either a grown person or a child, are always ready for use, and with little care

THE WORLD IS CHALLENGED
to produce so many well authenticated certificates of care, not only from intelligent patients, but from scientific Physicians. The sale now in New York is perfectly ASTONISHING, and thousands who visit the Crystal Palace where they are on exhibition, echain fall to obtain a chain before they leave the city.

Thanks be to the common sense of the people who are beginning to become disgusted with the practice of making a Drug Shop of their stomach—swallowing bottle first bottle of stekening, disgusting trush, having no more effect in even relieving, much less curing the disease for which they are recommended, than a Poor Man's Phaster applied to the top of the head would have in curing an infant of worms.

All these great and remarkable discoveries, by which cartification as if may seen—are made by men who cannot compute to addition to Mars.

The alove sale is postponed to the 25th day of August next, at the same place and time of day. Terms of sale will be one third cash and the residue secured by bond and mortgage on the premises with ten procedule and the cartification of Mrs.

Lany Yates, widow.—Dated. July 24th, 1854.
